Customer-focused software engineer with 5 years of experience designing enterprise integrations, automating business processes, and delivering production solutions across technical and non-technical teams. Strong in API integration, data transformation, SQL, TypeScript, Java, troubleshooting, documentation, and translating operational requirements into reliable workflows.

Experience

Senior Associate - Software Engineer *Aug 2022 — Feb 2026*
Northern Trust

Delivered enterprise integrations and workflow solutions for financial platforms while partnering with international teams and business stakeholders.

- Led end-to-end delivery of production features and integrations, from requirements and API design through testing, deployment, monitoring, and support.
- Defined API specifications, stored procedure interfaces, business logic, validation rules, and expected outcomes by collaborating across technical and business departments.
- Built TypeScript and React features backed by Spring Boot, Java, Oracle SQL, JPA/Hibernate, and Apache Kafka pipelines processing 2.5M daily transactions.
- Engineered automated health checks and validation scripts to detect deployment regressions, improve troubleshooting, and increase operational reliability.
- Produced system specifications, process flowcharts, maintenance guides, and troubleshooting documentation to support handoffs and long-term maintainability.
- Harnessed large language models (LLMs) to accelerate code exploration, implementation, debugging, and test iteration while validating their output.

Software Engineer Consultant *Dec 2021 — Jun 2022*
BluBracket (acquired by HashiCorp)

Built and supported security tooling integrated with source code, developer environments, and CI/CD pipelines.

- Built a React/Redux dashboard for automated vulnerability detection and remediation across development and CI/CD workflows.
- Resolved risk-scoring logic flaws and implemented Jest and Cypress testing to improve reliability and reduce false-positive alerts.

BPA Developer *Mar 2021 — Dec 2021*
Impact Networking, LLC

Delivered tailored automation solutions for enterprise business processes.

- Orchestrated C#/.NET and SQL automation solutions for OCR, HR, and fundraising workflows by identifying manual bottlenecks and translating requirements into implementations.

Projects

- **Meal Planner:** Delivered a multi-user SvelteKit, TypeScript, and Convex application with authentication, household onboarding, shared planning, real-time data, and edge-case handling. Harnessed large language models (LLMs) for implementation and debugging while validating outputs through testing, review, and product feedback.

Education

Iowa State University *Aug 2016 — Dec 2020*
BS - Computer Science

Skills and Tech

- **Integrations & Automation:** REST APIs, Webhooks, JSON, OAuth, Data Transformation, Apache Kafka.
- **Development & Data:** TypeScript, JavaScript, Java, Spring Boot, C#/.NET, SQL, Git.
- **Client Delivery:** Requirements Gathering, Stakeholder Collaboration, Documentation, Testing, Agile/Scrum.
